FOR IMMEDIATE RELEASE:

WHAT'S OLD IS NEW AGAIN

Watermark's Transitional sconce combines best of vintage and contemporary design

(Spring Creek, New York. February, 2005) In with the old, in with the new. Have the best of the past and the present in the timeless design and craftsmanship reflected in Watermark's new Transitional Sconce L100-6. The nostalgic style makes it a natural fit for any retro-minded bathroom, while an undeniably updated edge allows the fixture to feel perfectly at home in modern baths.

Created in the fine tradition that is the hallmark of all Watermark designs, the Transitional sconce offers a polished sophisticated look that makes it a beautiful addition to any bath décor. Crafted of brass construction, the fixture is substantial in size, measuring 9 1/2 inches deep, 17 1/2 inches wide and 5 inches tall, and it is UL-approved for a 60-watt base bulb. Versatility is a key element here, with 35 different finishes available, all covered by a lifetime warranty. Options include satin nickel, oil-rubbed bronze, polished gold, antique brass, pewter and charcoal. List prices range from \$295 to \$414, depending on the selected finish.

As part of Watermark's popular Transitional Collection, the side-by-side sconce is the perfect compliment to the other components of this remarkable design family. Select coordinating consoles, faucets, shower sets and bath accessories, all created by Watermark's talented team of world-renowned designers, architects and engineers. This dazzling bath ensemble adds an authentic air that is perfect for an older home in the midst of a complete bath renovation. It is equally impressive in a new home that aims to create its own vintage feel.

Watermark's Transitional sconce brings a breath of contemporary air to classic design, and the result is quite extraordinary – a luxurious light fixture that illuminates the best of yesterday and today.
